

The Fastest Path to CMMC Certification

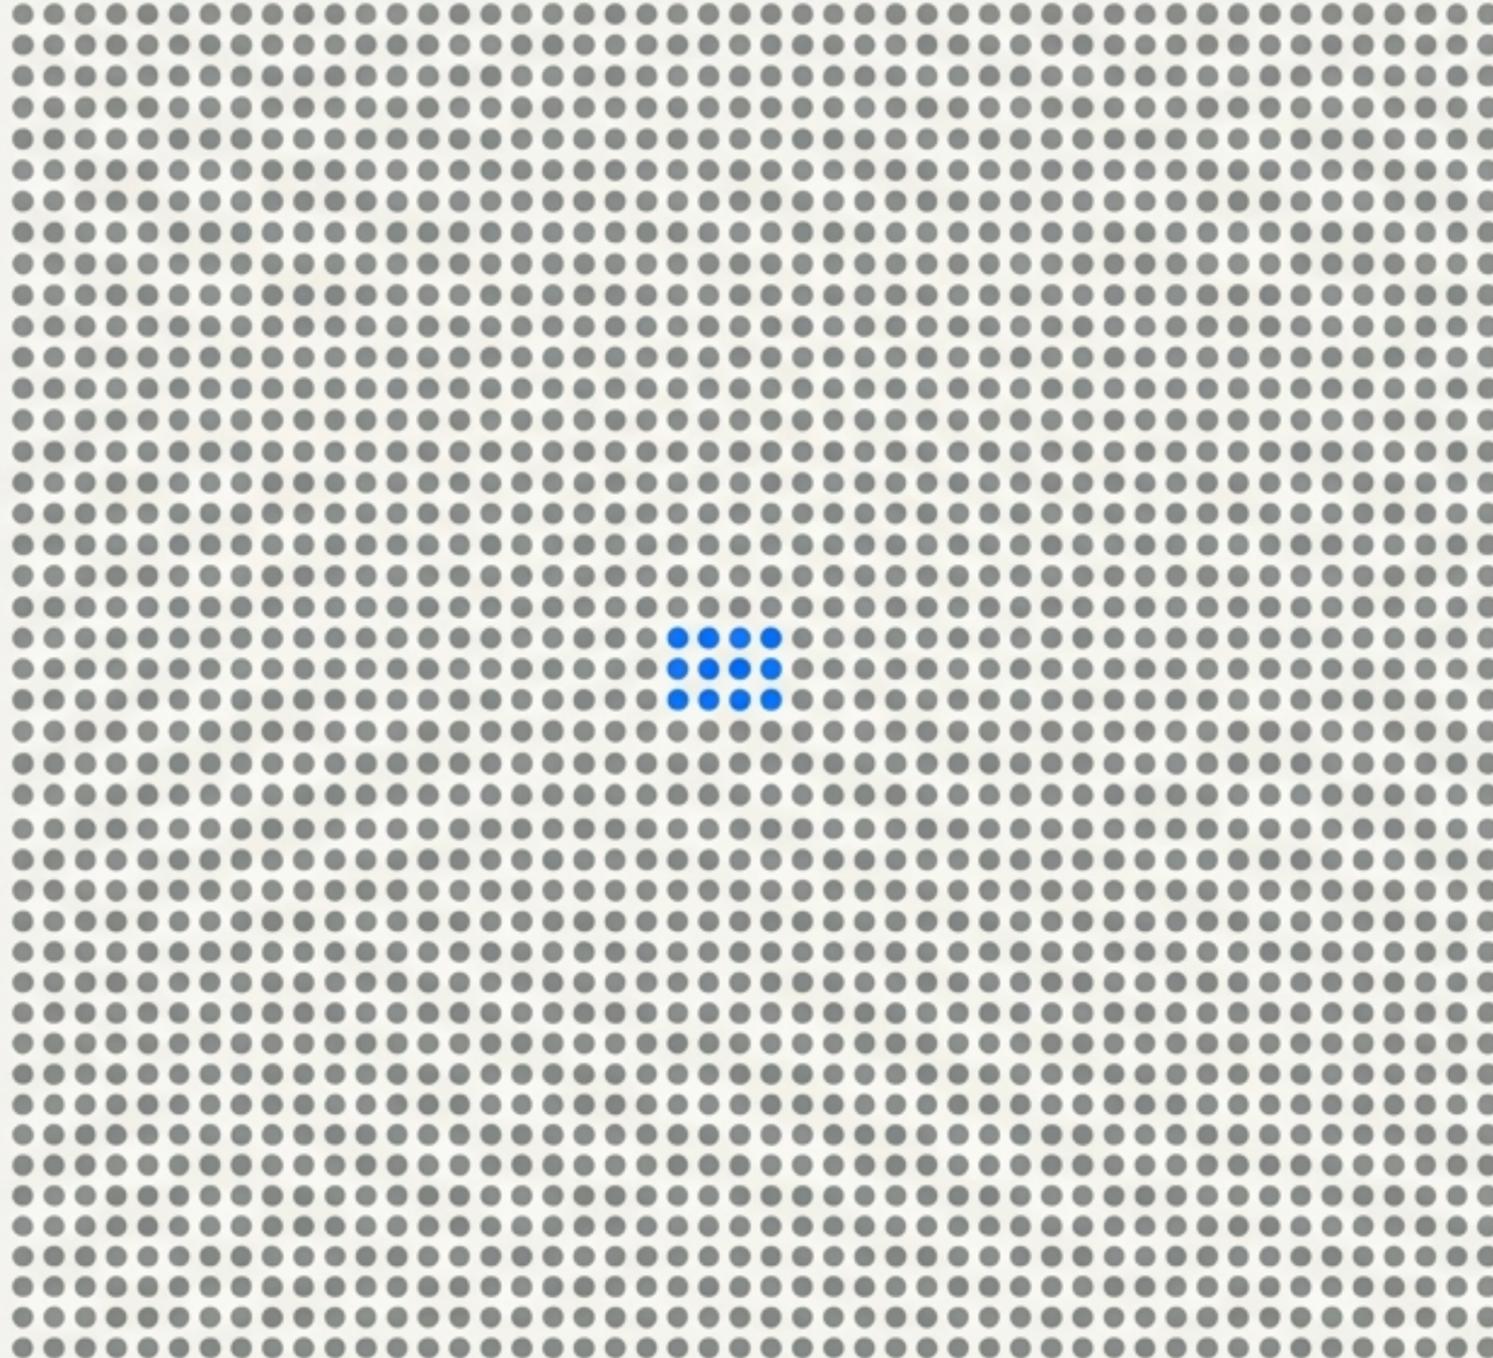

AI-powered compliance for the Defense Industrial Base.

Enforcement is underway, but readiness is critically low.

< 1%

Fewer than 800 of the 80,000 organizations requiring CMMC Level 2 have achieved certification.

47%

Of contractors have already received flow-down requests from prime contractors requiring proof of certification.

Traditional compliance is a black hole of time and money.

12 to 18 Months

\$100,000 to \$300,000+

Most DIB organizations spend over a year and hundreds of thousands of dollars preparing for a C3PAO assessment using manual processes and fragmented point solutions.

Zero to assessment-ready in under 8 weeks.

Introducing Secureframe Defense: The only end-to-end AI platform engineered to secure infrastructure, generate System Security Plans (SSPs), and maintain continuous CMMC compliance.

The Old Way

12-18 Months

Secureframe Defense: 4-8 Weeks

A radically simplified path to CMMC certification.

Stage 1: Deploy Secure CUI Environments

Stage 2: Document & Manage the Program

Stage 3: Get & Stay Certified

① Stage 1

Deploy secure CUI environments in minutes

Traditional Enclaves

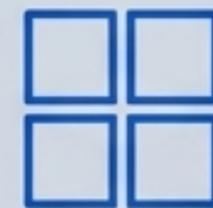

8–10 Weeks

(Requires heavy internal IT or expensive consultants)

Secureframe Platform

< 30 Minutes

Automatically configures Google Workspace or Microsoft GCC High with required access controls and event logging.
Auto-provisions secure Azure virtual desktops or enforces baselines via a FedRAMP Moderate device management solution.

2 Stage 2

Turn requirements into an AI-guided workflow. Introducing Defense Navigator.

Secureframe's AI engine automatically generates tailored SSPs and policies based on your exact environment.

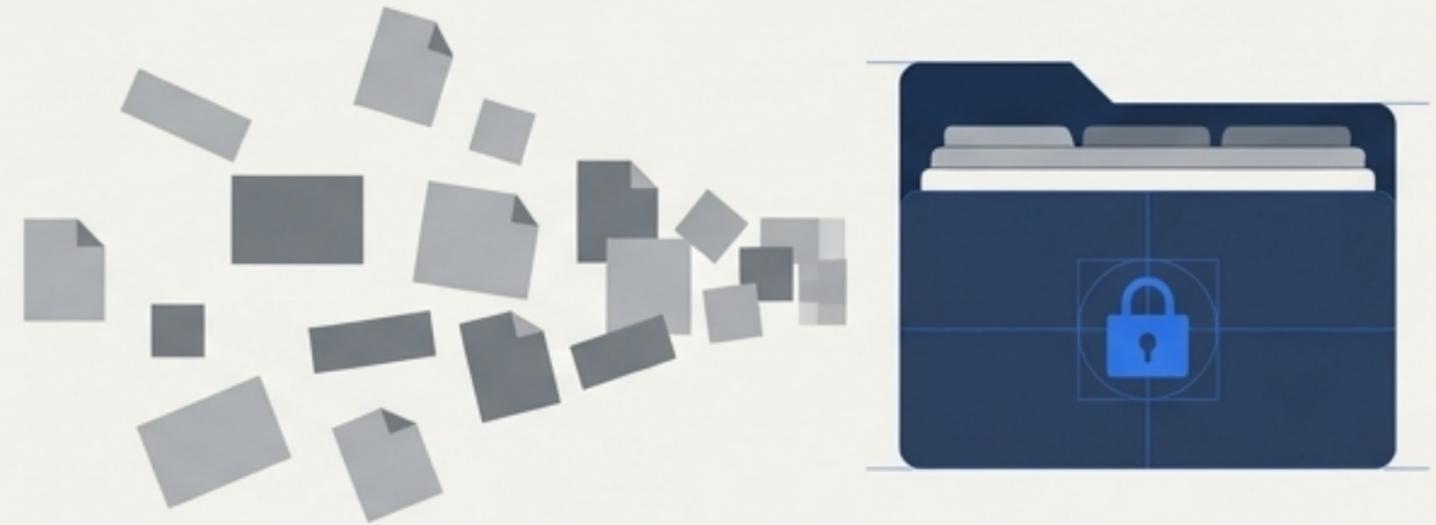

Built-in modules for risk assessments, vendor reviews, and continuous monitoring instantly flag non-compliant controls.

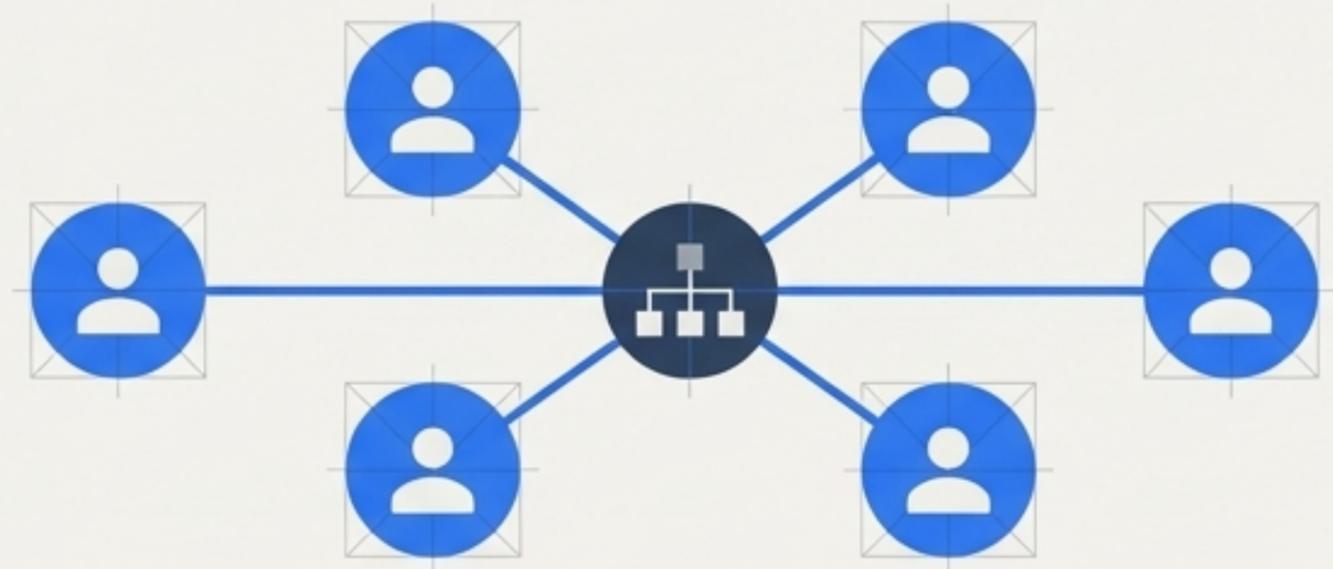

3 Stage 3

Package, audit, and stay certified.

The Audit Module automatically packages documentation and evidence artifacts for C3PAO review, eliminating manual evidence collection.

Gain immediate access to a vetted network of CMMC Registered Practitioners and experienced C3PAO partners.

Months saved.
Hundreds of hours recovered.

500+ Hours Saved

Using Secureframe to get NIST 800-171 and CMMC compliant saved us at least 500 hours. Having a li that can come alongside and augment your personnel force is a huge blessing. It was a weight off our shoulders.”

David Hoenisch

Lead Cybersecurity Engineer, Manufacturing Consulting Company
Passed CMNC Level 2 months before Phase 1 deadline.

Replacing manual processes with continuous assurance.

“Everyone in the defense tech space has to be compliant, but many are relying on manual processes. It’s the peace of mind that Secureframe provides... the fact that we have **a system as opposed to a person** trying to manage and ensure all of this - that’s the value add for us.”

Stephanie Castro
Director of Operations, Adyton

Federal-grade credentials, proven in the field.

CMMC Level 2 Certified

Achieved Sept 2025. Among the first 0.5% of expected L2 orgs.

FedRAMP 20x Low Authorized

Phase 2 Pilot selection, Jan 2026.

CyberAB RPO

Listed since March 2025, with 25+ CMMC Registered Practitioners on staff.

Secure your defense contracts today.
